

Icon

<https://playdocs1.orangeriver-ad055946.westus2.azurecontainerapps.io/play-docs/docs/ui-components/Display/Icon>

Icon

The component provides a comprehensive icon system built on top of Lucide icons, offering scalable vector graphics with extensive customization options, interaction support, and full accessibility compliance. It supports dynamic sizing, theming, interactive states, and seamless integration into any Angular application.

```
<aava-icon>
```

How to use

```
import { AavaIconComponent } from "@aava/play-core";
```

```
import { AavaIconComponent } from "@aava/play-core";
```

Basic Usage

Simple icon implementation using Lucide icon names with default styling.

```
<!-- Basic Icon Usage - Angular Example --><aava-icon iconName="home"></aava-icon><aava-icon iconName="user"></aava-icon><aava-icon iconName="heart"></aava-icon><aava-icon iconName="star"></aava-icon><aava-icon iconName="settings"></aava-icon>
```

```
<!-- Basic Icon Usage - Angular Example --><aava-icon iconName="home"></aava-icon><aava-icon iconName="user"></aava-icon><aava-icon iconName="heart"></aava-icon><aava-icon iconName="star"></aava-icon><aava-icon iconName="settings"></aava-icon>
```

Sizes

Flexible sizing options supporting both numeric pixel values and string-based sizing for responsive design.

```
<!-- Icon Sizes - Angular Example --><aava-icon iconName="star" iconSize="16"></aava-icon><aava-icon iconName="star" iconSize="24"></aava-icon><aava-icon iconName="star" iconSize="32"></aava-icon><aava-icon iconName="star" iconSize="48"></aava-icon><!-- String-based sizing --><aava-icon iconName="heart" iconSize="1rem"></aava-icon><aava-icon iconName="heart" iconSize="1.5rem"></aava-icon><aava-icon iconName="heart" iconSize="2rem"></aava-icon>
```

```
<!-- Icon Sizes - Angular Example --><aava-icon iconName="star" iconSize="16"></aava-icon><aava-icon iconName="star" iconSize="24"></aava-icon><aava-icon iconName="star" iconSize="32"></aava-icon><aava-icon iconName="star" iconSize="48"></aava-icon><!-- String-based sizing --><aava-icon iconName="heart" iconSize="1rem"></aava-icon><aava-icon iconName="heart" iconSize="1.5rem"></aava-icon><aava-icon iconName="heart" iconSize="2rem"></aava-icon>
```

Size Options

- Numeric values- Direct pixel sizing (e.g.,16,24,32)
- String values- CSS-compatible units (e.g.,'1rem','2em','100%')
- Responsive sizing- Use CSS custom properties for adaptive scaling

```
16
```

```
24
```

```
32
```

'1rem'
'2em'
'100%'

Colors

Comprehensive color customization with theme integration and semantic color support.

```
<!-- Icon Colors - Angular Example --><aava-icon iconName="palette" iconColor="#ff6b6b"></aava-icon><aava-icon
iconName="palette" iconColor="#4ecdc4"></aava-icon><aava-icon iconName="palette" iconColor="#45b7d1"></aava-icon>
<aava-icon iconName="palette" iconColor="#96ceb4"></aava-icon><aava-icon iconName="palette" iconColor="#ffeaa7">
</aava-icon>

<!-- Icon Colors - Angular Example --><aava-icon iconName="palette" iconColor="#ff6b6b"></aava-icon><aava-icon
iconName="palette" iconColor="#4ecdc4"></aava-icon><aava-icon iconName="palette" iconColor="#45b7d1"></aava-icon>
<aava-icon iconName="palette" iconColor="#96ceb4"></aava-icon><aava-icon iconName="palette" iconColor="#ffeaa7">
</aava-icon>
```

Color System

- Custom colors- Direct hex, RGB, HSL, or named color values
- CSS custom properties- Theme-aware color tokens
- Semantic colors- Contextual colors based on component state
- Disabled state- Automatic color adaptation for disabled icons

Accessibility

Built-in accessibility features ensuring inclusive user experience and WCAG compliance.

```
<!-- Accessibility Icons - Angular Example --><!-- Interactive icons with ARIA labels --><aava-icon
iconName="heart" cursor="true" iconColor="#ff6b6b" aria-label="Like this post"></aava-icon><aava-icon
iconName="bookmark" cursor="true" iconColor="#45b7d1" aria-label="Bookmark this article"></aava-icon><aava-icon
iconName="share-2" cursor="true" iconColor="#4ecdc4" aria-label="Share this content"></aava-icon><!--
Decorative icons with aria-hidden --><aava-icon iconName="star" iconColor="#ffeaa7" aria-hidden="true"> </aava-
icon><!-- Icons with semantic meaning --><aava-icon iconName="check-circle" iconColor="#4ecdc4" aria-
label="Success"></aava-icon><aava-icon iconName="alert-triangle" iconColor="#ffa726" aria-label="Warning"></aava-
icon><aava-icon iconName="x-circle" iconColor="#ff6b6b" aria-label="Error"></aava-icon>

<!-- Accessibility Icons - Angular Example --><!-- Interactive icons with ARIA labels --><aava-icon
iconName="heart" cursor="true" iconColor="#ff6b6b" aria-label="Like this post"></aava-icon><aava-icon
iconName="bookmark" cursor="true" iconColor="#45b7d1" aria-label="Bookmark this article"></aava-icon><aava-icon
iconName="share-2" cursor="true" iconColor="#4ecdc4" aria-label="Share this content"></aava-icon><!--
Decorative icons with aria-hidden --><aava-icon iconName="star" iconColor="#ffeaa7" aria-hidden="true"> </aava-
icon><!-- Icons with semantic meaning --><aava-icon iconName="check-circle" iconColor="#4ecdc4" aria-
label="Success"></aava-icon><aava-icon iconName="alert-triangle" iconColor="#ffa726" aria-label="Warning"></aava-
icon><aava-icon iconName="x-circle" iconColor="#ff6b6b" aria-label="Error"></aava-icon>
```

Accessibility Features

- Semantic HTML- Proper button element for interactive icons
- ARIA compliance- Appropriate ARIA attributes and roles
- Keyboard navigation- Full keyboard support for interactive icons
- Screen reader support- Meaningful descriptions and labels
- Focus management- Clear focus indicators and proper focus order
- High contrast- Support for high contrast accessibility modes

API Reference

Inputs

Property	Type	Default	Description
iconName	string	' '	Lucide icon name to display
color	string	' '	Custom color override (deprecated, use iconColor)
disabled	boolean	false	Whether the icon is disabled
iconColor	string	'#a1a1a1'	Icon color using hex, RGB, HSL, or CSS custom properties
iconSize	number string	24	Icon size in pixels (number) or CSS units (string)
cursor	boolean	false	Whether to show pointer cursor and enable interactions
hoverColor	string	'none'	Color applied on hover

iconName
string
' '
color
string
' '
disabled
boolean
false
iconColor
string
'#a1a1a1'
iconSize
number string
24
cursor
boolean
false
hoverColor
string
'none'

Outputs

Event Type Description
userClick EventEmitter Emitted when interactive icon is clicked
userClick
EventEmitter<Event>

Properties

Property Type Description
computedColor string Calculated color value based on state
isInteractive boolean Whether icon accepts user interactions
isDisabled boolean Current disabled state
computedColor
string
isInteractive
boolean
isDisabled
boolean

Methods

Method Parameters Description
handleClick() event: Event Process click events for interactive icons
handleClick()
event: Event

CSS Custom Properties

Property Description
--button-icon-color-disabled Color used for disabled icon state
--icon-transition Transition animation for state changes
--icon-hover-color Color used on hover for interactive icons
--icon-focus-outline Focus outline styling for accessibility
--icon-focus-outline-offset Focus outline offset for clear visibility
--button-icon-color-disabled
--icon-transition
--icon-hover-color
--icon-focus-outline
--icon-focus-outline-offset

Host Styling

The component applies the following host styles automatically:

```
display: inline-flex;align-items: center;justify-content: center;vertical-align: middle;height: [iconSize]px; /*
Dynamic based on iconSize input */
```

```
display: inline-flex;align-items: center;justify-content: center;vertical-align: middle;height: [iconSize]px; /*
Dynamic based on iconSize input */
```

Lucide Icon Integration

The component leverages Lucide icons, providing access to over 1,000 high-quality SVG icons.

Icon Library

- Comprehensive collection- 1,000+ carefully designed icons
- Consistent design- Uniform stroke width and styling
- Scalable vectors- Crisp appearance at any size
- Regular updates- Actively maintained icon library
- Tree-shakable- Only used icons are bundled

Icon Naming

Icons use kebab-case naming convention from the Lucide library:

```
// Common icon examplesiconName = "home";iconName = "user-circle";iconName = "arrow-right";iconName = "check-
circle";iconName = "alert-triangle";
```

```
// Common icon examplesiconName = "home";iconName = "user-circle";iconName = "arrow-right";iconName = "check-
circle";iconName = "alert-triangle";
```

Best Practices

Design Guidelines

- Choose appropriate sizes- Use consistent sizing across similar interface elements
- Maintain visual hierarchy- Larger icons for primary actions, smaller for secondary
- Use semantic colors- Colors should convey meaning and match design system
- Consider context- Icon choice should clearly communicate its purpose
- Consistent spacing- Maintain proper spacing around icons in layouts

Accessibility

- Provide meaningful context- Use proper ARIA labels for screen readers
- Interactive indication- Clearly distinguish interactive vs decorative icons
- Keyboard navigation- Ensure all interactive icons are keyboard accessible
- Focus indicators- Maintain clear focus states for navigation
- Color contrast- Ensure sufficient contrast for all color combinations

Performance

- Icon optimization- Lucide icons are automatically optimized SVGs
- Bundle efficiency- Tree-shaking ensures only used icons are bundled
- Avoid excessive sizing- Use reasonable icon sizes to maintain performance
- Minimize color changes- Frequent color updates can impact performance

Integration

- Theme consistency- Use CSS custom properties for consistent theming
- Component composition- Icons work well within buttons, forms, and navigation
- Event handling- Properly handle click events for interactive use cases
- State management- Consider disabled states in your application logic
