Card

The AAVA Play card system provides a flexible and modular approach to creating content containers. It consists of a main card container (aava-default-card) and dedicated subcomponents for header (aava-card-header), content (aava-card-content), footer (aava-card-footer), and actions (aava-card-actions). This modular design allows for consistent, well-structured content layouts across your application.

aava-default-card
aava-card-header
aava-card-content
aava-card-footer
aava-card-actions

How to use

```
import { AavaDefaultCardComponent, AavaCardHeaderComponent, AavaCardContentComponent, AavaCardFooterComponent, AavaTagComponent,} from "@aava/play-core";

import { AavaDefaultCardComponent, AavaCardHeaderComponent, AavaCardContentComponent, AavaCardFooterComponent, AavaTagComponent,} from "@aava/play-core";
```

Basic Usage

A simple card with basic content structure.

```
<aava-default-card> <aava-card-header> <div class="header-with-badge"> <h4>Article Title</h4> <aava-tag [pill]="true" label="New" color="primary"></aava-tag> </div> </aava-card-header> <aava-card-content>
<p> A complete card example with header, content, and footer sections. Perfect for articles, blog posts,
or detailed information displays. </p> </aava-card-content> <aava-card-footer> <div class="footer-info">
<div class="meta-info"> <aava-icon iconName="calendar-days" [iconSize]="16"
iconColor="#6c757d" ></aava-icon> <span>Dec 15, 2024</span> </div> <div class="meta-info">
<aava-icon iconName="user" [iconSize]="16" iconColor="#6c757d" ></aava-icon>
<span>John Doe</span> </div> </div> </aava-card-footer></aava-default-card>

<aava-default-card> <aava-card-header> <div class="header-with-badge"> <h4>Article Title</h4> <aava-tag [pill]="true" label="New" color="primary"></aava-tag> </div> </aava-card-header> <aava-card-content>
<p> A complete card example with header, content, and footer sections. Perfect for articles, blog posts,
or detailed information displays. </p> </aava-card-content> <aava-card-footer> <div class="footer-info">
<div class="meta-info"> <aava-icon iconName="calendar-days" [iconSize]="16"
iconColor="#6c757d" ></aava-icon> <span>Dec 15, 2024</span> </div> <div class="meta-info">
<aava-icon iconName="user" [iconSize]="16" iconColor="#6c757d" ></aava-icon>
<span>John Doe</span> </div> </div> </aava-card-footer></aava-default-card>
```

With Header

Card with a header section for titles, navigation, or metadata.

```
<aava-default-card> <aava-card-header> <div class="header-with-icon"> <aava-icon iconName="shield-check" [iconSize]="24" iconColor="#28a745" ></aava-icon> <h4>Security Settings</h4>
</div> </aava-card-header> <aava-card-content> <p> Icons in headers help convey meaning quickly and add
visual interest. This card shows security-related settings. </p> <ul class="settings-list">
<li>Two-factor authentication enabled</li> <li>Password strength: Strong</li> <li>Last login: 2 hours
ago</li> </ul> </aava-card-content></aava-default-card>
```

```
<aava-default-card> <aava-card-header> <div class="header-with-icon"> <aava-icon iconName="shield-check" [iconSize]="24" iconColor="#28a745"> </aava-icon> <h4>Security Settings</h4> </div> </aava-card-header> <aava-card-content> <p> Icons in headers help convey meaning quickly and add visual interest. This card shows security-related settings. </p> <ul class="settings-list"> <li>Two-factor authentication enabled</li> <li>Password strength: Strong</li> <li>Last login: 2 hours ago</li> </ul> </aava-card-content></aava-default-card>
```

With Actions

Card with action buttons using the dedicated actions component.

```
<aava-default-card> <aava-card-header> <h4>Account Settings</h4> </aava-card-header> <aava-card-content> <p> Manage your account preferences, security settings, and personal information. </p> <ul class="settings-list"> <li>Profile Information</li> <li>Security & Privacy</li> <li>Notification Preferences</li> </ul> </aava-card-content> <aava-card-footer> <div class="primary-actions"> <aava-button label="Save Changes" variant="primary" size="sm" (click)="onPrimaryAction('Save Changes')"> </aava-button> </div> </aava-card-footer></aava-default-card>
```

```
<aava-default-card> <aava-card-header> <h4>Account Settings</h4> </aava-card-header> <aava-card-content> <p> Manage your account preferences, security settings, and personal information. </p> <ul class="settings-list"> <li>Profile Information</li> <li>Security & Privacy</li> <li>Notification Preferences</li> </ul> </aava-card-content> <aava-card-footer> <div class="primary-actions"> <aava-button label="Save Changes" variant="primary" size="sm" (click)="onPrimaryAction('Save Changes')"> </aava-button> </div> </aava-card-footer></aava-default-card>
```

```
onPrimaryAction(action: string) { console.log(`Primary action: ${action}`); }
```

```
onPrimaryAction(action: string) { console.log(`Primary action: ${action}`); }
```

Example Cards

```
<div class="grid-container"> <div class="test-group"> <aava-image-card [data]="verticalWithActions" (buttonClicked)="onButtonClick($event)" (cardClick)="onCardClick()" ></aava-image-card> </div> <div class="test-group"> <aava-image-card [data]="verticalWithoutActions1" (cardClick)="onCardClick()" ></aava-image-card> </div> <div class="test-group"> <aava-image-card [data]="verticalWithoutActions3" (cardClick)="onCardClick()" ></aava-image-card> </div> <div class="test-group stack"> <aava-image-card [data]="horizontalWithoutActions4" (cardClick)="onCardClick()" ></aava-image-card> <aava-image-card [data]="horizontalWithoutActions2" (cardClick)="onCardClick()" ></aava-image-card> </div><!-- Horizontal Cards Row --><div class="grid-container horizontal-row"> <div class="test-group"> <aava-image-card [data]="horizontalWithActions" (buttonClicked)="onButtonClick($event)" (cardClick)="onCardClick()" > </aava-image-card> </div> <div class="test-group"></div></div>
```

```
<div class="grid-container"> <div class="test-group"> <aava-image-card [data]="verticalWithActions" (buttonClicked)="onButtonClick($event)" (cardClick)="onCardClick()" ></aava-image-card> </div> <div class="test-group"> <aava-image-card [data]="verticalWithoutActions1" (cardClick)="onCardClick()" ></aava-image-card> </div> <div class="test-group"> <aava-image-card [data]="verticalWithoutActions3" (cardClick)="onCardClick()" ></aava-image-card> </div> <div class="test-group stack"> <aava-image-card [data]="horizontalWithoutActions4" (cardClick)="onCardClick()" ></aava-image-card> <aava-image-card [data]="horizontalWithoutActions2" (cardClick)="onCardClick()" ></aava-image-card> </div><!-- Horizontal Cards Row --><div class="grid-container horizontal-row"> <div class="test-group"> <aava-image-card [data]="horizontalWithActions" (buttonClicked)="onButtonClick($event)" (cardClick)="onCardClick()" > </aava-image-card> </div> <div class="test-group"></div></div>
```

```
onButtonClick(event: { action: string | undefined, button: any }) { alert(`Button clicked! Text: "${event.button.text}" | Action: ${event.action}`); console.log('Button click event:', event); }
onCardClick() { console.log('Card clicked!'); } // Card 1: Vertical With Actions

left: 'Text Casus Generibus(15)',      right: '15th May, 18:00'      },      layout: {      orientation: 'vertical',
imageGrid: 'top',      infoGrid: 'bottom'      }      }; // Card 6: Horizontal Without Actions (Card 4)
horizontalWithoutActions4: ImageCardData = {      variant: 'withoutActions',      title: 'Generate UI Design',
image: '/assets/card-1-h.svg',      description: 'Lorem ipsum dolor sit amet, consectetur adipiscing elit. Phasellus
vulputate, odio...',      tags: [      {      label: 'Tag',      size: 'xs',      color: 'primary',
shape: 'square'      }      ],      subDescription: {      left: 'Text Casus Generibus(15)',      right: '15th May,
18:00'      },      layout: {      orientation: 'horizontal',      imageGrid: 'right',      infoGrid: 'left'      }
};

```

Features

Modular Components

- Default Card(aava-default-card): Main card container with proper styling and accessibility

- Card Header(aava-card-header): Dedicated header component with semantic HTML
- Card Content(aava-card-content): Main content area component
- Card Footer(aava-card-footer): Footer section component
- Card Actions(aava-card-actions): Action buttons container component

aava-default-card
aava-card-header
aava-card-content
aava-card-footer
aava-card-actions

Accessibility

- Semantic Structure: Proper ARIA roles and landmarks
- Keyboard Navigation: Full keyboard accessibility
- Screen Reader Support: Clear content structure for assistive technologies

Responsive Design

- Flexible Width: Adapts to container width
- Mobile Friendly: Optimized for all screen sizes
- Consistent Spacing: Maintains proper spacing across devices

API Reference

DefaultCardComponent

The main card container component that provides the base card structure.

Selector:aava-default-card

aava-default-card

Property	Type	Default	Description
No inputs	-	-	Uses content projection for all content

Methods:None

Events:None

CardHeaderComponent

Header section component with semantic HTML structure and typography styling.

Selector:aava-card-header

aava-card-header

Property	Type	Default	Description
No inputs	-	-	Uses content projection for header content

Methods:None

Events:None

CardContentComponent

Main content area component for displaying primary card content.

Selector:aava-card-content

aava-card-content			
Property	Type	Default	Description
No inputs	-	-	Uses content projection for main content

Methods:None

Events:None

CardFooterComponent

Footer section component for additional information or metadata.

Selector:aava-card-footer

aava-card-footer			
Property	Type	Default	Description
No inputs	-	-	Uses content projection for footer content

Methods:None

Events:None

CardActionsComponent

Action buttons container component for user interactions.

Selector:aava-card-actions

aava-card-actions			
Property	Type	Default	Description
No inputs	-	-	Uses content projection for action buttons

Methods:None

Events:None

CSS Custom Properties

The card components use the following CSS custom properties for styling:

Property	Description	Default Value
--card-default-border	Border color for the default card	Defined in theme
--tooltip-shadow	Box shadow for the card	Defined in theme
--card-heading1-font	Font family for h1 elements in header	Defined in theme
--card-heading1-font-weight	Font weight for h1 elements in header	Defined in theme
--card-default-border		
--tooltip-shadow		
--card-heading1-font		
--card-heading1-font-weight		

Component Styling

Default Card:

- Border radius: 24px
- Border: 1px solid with--card-default-border
- Background: Linear gradient from white to light gray
- Box shadow: Uses--tooltip-shadow
- Padding: 24px
- Width: 100%

```
--card-default-border
```

```
--tooltip-shadow
```

Card Header:

- Uses semantic

element withrole="banner"

- Typography styling for h1 elements
- Custom font family and weight support

```
<header>
```

```
role="banner"
```

Card Content:

- Clean content area with no additional styling
- Uses content projection for flexible content

Card Footer:

- Clean footer area with no additional styling
- Uses content projection for flexible content

Card Actions:

- Clean actions area with no additional styling
- Uses content projection for flexible content

Best Practices

Design Guidelines

- Content Hierarchy: Use headers for titles, content for main information, and footers for actions or metadata
- Consistent Spacing: Maintain consistent padding and margins across all cards
- Visual Balance: Ensure content is well-distributed within the card
- Clear Boundaries: Use borders or shadows to clearly define card boundaries

Component Usage

- Always useaava-default-cardas the main container
- Use dedicated subcomponentsfor each section (header, content, footer, actions)
- Maintain semantic structurewith proper heading hierarchy
- Keep components focusedon their specific responsibilities

```
aava-default-card
```

Accessibility

- Semantic Structure: Use proper heading hierarchy within card headers
- Focus Management: Ensure logical tab order through card content
- Screen Reader Support: Provide descriptive content for assistive technologies
- Color Contrast: Maintain sufficient contrast for all text content

Performance

- Modular Design: Use only the components you need
- Change Detection: Leverage OnPush strategy for better performance
- Lazy Loading: Consider lazy loading for cards with heavy content
- Memory Management: Clean up event listeners and subscriptions
