- sm (Small)- Compact option.
- md (Medium)- Default size for general usage.
- lg (Large)- For prominent actions or primary uploads.
- xl (Extra Large)- When emphasizing upload as a major user task.

File Validation

```

```
onFileChange(files: File[]): void { console.log('Files changed:', files); }
```

```
onFileChange(files: File[]): void { console.log('Files changed:', files); }
```

Built-in validation ensures that uploaded files meet specific criteria:

- Allowed Formats: Restrict file types with the allowedFormats input.
- File Size Limit: Prevent large files using the maxFileSize property.
- Duplicate Check: Detect and warn users about duplicate uploads. Validation feedback is displayed inline with error messages.

Single vs Multiple

```
<div> <h1>Single File Mode</h1> <p>Only one file can be selected at a time</p> <aava-file-upload
componentTitle="Select One File" [single FileMode]="" true" layout="tags" [allowedFormats]=["pdf", 'doc',
'jpg', 'png']" (selectedList)="onSingleFileChange($event)" > </aava-file-upload> <div class="result"
*ngIf="singleFile.length > 0"> <strong>Selected:</strong> {{singleFile[0].name}} </div></div><div>
<h1>Multiple Files Mode</h1> <p>Multiple files can be selected (up to 5)</p> <aava-file-upload
componentTitle="Select Multiple Files" [single FileMode]="" false" layout="tags" [maxFiles]="" 3"
[allowedFormats]=["pdf", 'doc', 'jpg', 'png']" (selectedList)="onMultipleFileChange($event)" > </aava-file-
upload> <div class="result" *ngIf="multipleFiles.length > 0"> <strong>Selected Files:</strong>
{{multipleFiles.length}} <ul> <li *ngFor="let file of multipleFiles">{{file.name}}</li> </ul> </div>
</div>
```

```
<div> <h1>Single File Mode</h1> <p>Only one file can be selected at a time</p> <aava-file-upload
componentTitle="Select One File" [single FileMode]="" true" layout="tags" [allowedFormats]=["pdf", 'doc',
'jpg', 'png']" (selectedList)="onSingleFileChange($event)" > </aava-file-upload> <div class="result"
*ngIf="singleFile.length > 0"> <strong>Selected:</strong> {{singleFile[0].name}} </div></div><div>
<h1>Multiple Files Mode</h1> <p>Multiple files can be selected (up to 5)</p> <aava-file-upload
componentTitle="Select Multiple Files" [single FileMode]="" false" layout="tags" [maxFiles]="" 3"
[allowedFormats]=["pdf", 'doc', 'jpg', 'png']" (selectedList)="onMultipleFileChange($event)" > </aava-file-
upload> <div class="result" *ngIf="multipleFiles.length > 0"> <strong>Selected Files:</strong>
{{multipleFiles.length}} <ul> <li *ngFor="let file of multipleFiles">{{file.name}}</li> </ul> </div>
</div>
```

```
singleFile: File[] = []; multipleFiles: File[] = []; onSingleFileChange(files: File[]): void {
  console.log('Single file changed:', files); this.singleFile = files; } onMultipleFileChange(files: File[]):
```

```
void { console.log('Multiple files changed:', files); this.multipleFiles = files; }
```

```
singleFile: File[] = []; multipleFiles: File[] = []; onSingleFileChange(files: File[]): void {  
  console.log('Single file changed:', files); this.singleFile = files; } onMultipleFileChange(files: File[]): void {  
  console.log('Multiple files changed:', files); this.multipleFiles = files; }
```

Configure whether users can upload a single file or multiple files at once:

- Uses `singleFileDialog` = `true` for a single-file input.
- Keep it `false` to allow multi-selection. The component automatically manages file replacement and count validation.

```
singleFileDialog = true
```

```
false
```

```

Customize button variants, labels, colors, and disabled states for consistent UI theming. The component supports:

- Custom border and divider colors

- Dynamic styles via customStyles
- Disabled state to prevent interactions
- Configurable button variants for upload and delete actions

Display uploaded files in different preview formats:

- default- Shows file cards with color-coded type indicators.
- table- Tabular view with configurable columns (fileName, fileSize, fileType, etc.) Each layout provides structured visibility of uploaded files and supports deletion.

Advanced Features

Explore extended functionality for advanced scenarios:

- Custom table columns for preview layouts.
- Dynamic color mapping for file types.
- Custom upload animations.
- Event emitters (selectedList, deletedList) for parent integration.

These options make the File Upload component flexible for enterprise-grade workflows.

File Validation

Format Validation

The component validates file types based on the allowedFormats input:

```
allowedFormats
```

```
// Default allowed formats
allowedFormats = [ "jpeg", "jpg", "png", "svg", "doc", "docx", "xlsx", "txt",
"pdf", ]; // Custom format restriction
allowedFormats = [ "pdf", "doc", "docx" ]; // Only document files
```

```
// Default allowed formats
allowedFormats = [ "jpeg", "jpg", "png", "svg", "doc", "docx", "xlsx", "txt",
"pdf", ]; // Custom format restriction
allowedFormats = [ "pdf", "doc", "docx" ]; // Only document files
```

Size Validation

File size validation is controlled by the maxFileSize input:

```
maxFileSize
```

```
// 3MB defaultmaxFileSize = 3 * 1024 * 1024;// 10MB limitmaxFileSize = 10 * 1024 * 1024;// 1MB limitmaxFileSize = 1024 * 1024;
```

```
// 3MB defaultmaxFileSize = 3 * 1024 * 1024;// 10MB limitmaxFileSize = 10 * 1024 * 1024;// 1MB limitmaxFileSize = 1024 * 1024;
```

Duplicate Prevention

The component automatically prevents duplicate file uploads by checking:

- File name
- File size
- File content (basic comparison)

Error Handling

File Format Error

Displayed when an unsupported file type is selected:

```
<div class="error-message" role="alert"> Invalid file type. Allowed formats: JPEG, JPG, PNG, SVG, DOC, DOCX, XLSX, TXT, PDF.</div>
```

```
<div class="error-message" role="alert"> Invalid file type. Allowed formats: JPEG, JPG, PNG, SVG, DOC, DOCX, XLSX, TXT, PDF.</div>
```

File Size Error

Displayed when a file exceeds the maximum size limit:

```
<div class="error-message" role="alert"> File is too large. Maximum size allowed is 3 MB</div>
```

```
<div class="error-message" role="alert"> File is too large. Maximum size allowed is 3 MB</div>
```

Maximum Files Error

Displayed when the maximum file limit is exceeded:

```
<div class="error-message" role="alert">Maximum of 5 files allowed</div>
```

```
<div class="error-message" role="alert">Maximum of 5 files allowed</div>
```
